

### REMARKS

Upon receipt of a Notice of Allowance of Allowance for the above-referenced application, it was noted that the change to the title requested by applicants in the Preliminary Amendment filed January 8, 2006 was not entered. A copy of the Preliminary Amendment is attached for the examiner's review and convenience.

Since the Office made no comment on the non-entry, the non-entry appears to have been inadvertent. Accordingly, please amend the title of this application as set forth in this 1.312 Amendment, which is in accord with the title information appearing in the patent specification.

It is believed that the above amendment does not add new material to the application and, further, corrects only non substantive errors in the application. Accordingly, applicants respectfully request the acceptance of the amendment, inclusion of the amendment in the issued patent and prompt notification of same.

Respectfully submitted,

Altera Law Group, LLC
